

e-BRIDGE Job Separator

Simply and Easily Perform Batch Printing

- > Automatically inserts separation sheets
- > Easy to use — No training required
- > Improves workflow for successive, volume printing
- > Batch print multiple sets from any Windows application
- > Saves sorting time
- > Driver-based solution
- > Store settings for common batch printing jobs

Sorting Made Simple

Toshiba's e-BRIDGE Job Separator further enhances your Toshiba e-STUDIO Multifunction Peripheral (MFP) by allowing it to simply and easily perform batch printing from any Windows application. It does this by allowing the user to create multiple sets of a job, divided by a separation page. Think of the time you'll save from sorting large sets of documents into batches.

How It Works

The user selects the print driver that has been associated with the e-BRIDGE Job Separator and verifies one copy to be printed then clicks "Properties" to set finishing requirements. Clicking "OK" will display the e-BRIDGE Job Separator window.

The user then enters the number of sets for a particular distribution destination, a department code if required, a description of the destination, then select other settings as needed such as paper size, paper source, etc. The user then selects "Add to Job List". This is done for each destination with the appropriate number of sets. Selecting "Print" will start the print job and the quantity of sets will be separated by a Separation Page which includes the information entered in the e-BRIDGE Job Separator window. Frequently used settings can be saved as a template and easily recalled for batch print jobs performed on a regular basis.

e-BRIDGE Job Separator is ideal for:

- > Education — print specified allotments of multiple sets of worksheets, exams, syllabi, etc., with separation sheets for different classes.
- > Government — divide documents, publications, lists, or forms among relevant departments.
- > Church/Faith — separate newsletters, bulletins, forms, or publications for distribution.
- > Associations & Organizations — batch print notices, meeting minutes, membership lists, etc. for distribution among chapters.
- > Finance — easily organize volume printing with use of separation sheets for departmental distribution

Requirements

> Supported by the following Toshiba e-STUDIO MFPs:

e-STUDIO™165/205

e-STUDIO™350/450

e-STUDIO™167/207/237 †

e-STUDIO™352/452

e-STUDIO™200L/230/280

e-STUDIO™520/600/720/850

e-STUDIO™202L/232/282

e-STUDIO™520T/600T/720T

e-STUDIO™3511c/4511c

e-STUDIO™2500c/3500c/3510c

e-STUDIO™281c/351c/451c

> Utilizes the e-BRIDGE Postscript (PS3) print driver

† Requires GA-1190 attachment option

System Requirements

Display Resolution	1,024 x 768 dots or more
Display Color	High color (16 bit) or higher is recommended
CPU	Pentium 266 MHz minimum or faster recommended
Memory	128 megabytes (MB) of RAM or higher recommended
Operating System	Windows XP Professional with Service Pack 2 (32-bit)

Effective Documents, Properly Distributed for Less Cost

Our Solutions enable you to distribute documents more efficiently and with less expense by addressing how you create and output your documents, and present them in their final form.

When coupled with Toshiba e-STUDIO devices, Toshiba's software provides the following benefits:

- > Increased speed and impact of business communications
- > Customized and controlled print job processing
- > Improved workflow and maximized print throughput
- > Flexibility of document management and output
- > The ability to design, create, and deliver electronic documents, forms, and reports
- > Enabled printing and finishing features on Toshiba e-STUDIO devices

Designs and specifications subject to change without notice. For best results and reliable performance, always use supplies manufactured or designated by Toshiba. Not all options and features may be available at the time of product launch. Companies and products may have registered trademarks and hereby acknowledged.
